

ALPE D'HUEZ 01

ABOUT:

The Alpe d'Huez 01 is more than a match for its namesake climb clinging to the slopes above the Bourg d'Oisans valley. To tackle mythical ascents everywhere, we've created a legendary bicycle – at under 900g, the Alpe d'Huez 01 is the lightest frame TIME has produced. A simple look at the scale, however, doesn't reveal the agility and comfort of this remarkable machine. By blending Vectran® fiber with high-strength and high-modulus carbon, we've orchestrated the perfect balance of mass, rigidity and deflection – the key ingredients for a climbing virtuoso. The Alpe d'Huez 01 rider is looking for top performance with contemporary styling and appreciates the stiffness and precision of a racing frame with elegant forms and clean lines. Climbers looking for low weight and powerful 'roleurs' who enjoy torturing frames will both appreciate the ruthless efficiency of this no-nonsense machine.

ALPE D'HUEZ 21

ABOUT:

To make lightweight performance more accessible, we created the Alpe d'Huez 21. Instead of the Vectran® fibers used in the Alpe d'Huez 01, this frame blends Basalt filaments with a smaller proportion of high-modulus carbon and a greater amount of high-strength carbon. The modified layup targets comfort and smooths the ride while retaining a pleasantly refined acceleration and impeccable handling. If the Alpe d'Huez 01 is our two-seat supercar, the Alpe d'Huez 21 is a V10 performance sedan.

The Alpe d'Huez 21 rider has learned that a smooth bike is often the fastest bike, and weight is just one factor when choosing a bike tough enough to handle the rigors of daily use. This rider is looking for a tool that excels on every ride, over any course profile, eschewing the luxuries of fresh tarmac and spotless handlebar tape.
